HEALTHIER COMMUNITY EVENTS

Local events offer a great opportunity for families and communities to get together for entertainment, increase skills, keep active, network with other people in the area as well as service providers.

You can make a positive difference to the health and wellbeing of your community by choosing the food vendors at events wisely and by encouraging the availability of healthier food options.

ABOUT THE HEALTHIER VENDOR GUIDE

The Healthier Vendor Guide (HVG) is a go-to-guide for groups, organisations and event planners that are responsible for coordinating the food and drinks offered at an event. It is updated quarterly for summer, autumn, winter and spring.

The HVG is produced by the team at the Western Australian School Canteen Association Inc. (WASCA). WASCA is a not-for-profit health promotion charity that assists food services to provide and promote healthy choices in schools, workplaces, hospitals and in the community. WASCA works in partnership with many Healthway sponsored organisations to provide them with advice to increase healthy food and drinks options at events.

To be included in the HVG, WASCA determines the suitability of the products on the vendor's menu using the 'Traffic light' system. The 'Traffic light' system is based on the Australian Dietary Guidelines and Department of Health's - 'Healthy Options WA' Food and nutrition policy. It categorises products as 'green', 'amber', and 'red'. There are two HVG categories:

1. 'Food and beverage vendor'

- Sells predominantly food with some beverages available
- Meets traffic light criteria of >40% 'green' and <30% 'red' menu items.

2. 'Beverage only vendor'

- Only sells beverages (e.g fresh fruit juice)
- Meets traffic light criteria of only 'green' and/or 'amber' beverage items.

'TRAFFIC LIGHT' SYSTEM

The 'Traffic light' system is based on the Australian Dietary Guidelines. Examples include:

GREEN Fill the menu	AMBER Select carefully	RED Only occasionally
<p>These are the healthiest choices because they are excellent sources of important nutrients and represent one or more of the five food groups needed for optimum health and wellbeing. They are low in saturated fat, added sugar and salt. Fill the menu with mostly green options.</p> <p>Examples include:</p> <ul style="list-style-type: none"> » bottle plain/sparkling water » fruit, vegetables and legumes » Breads, pastas and rice » plain milk (300mL or less) » soup and vegetable based meals e.g. pasta and rice. » Lean meat, fish and poultry 	<p>These have some nutritional value but contain moderate levels of saturated fat, added sugar and/or salt and can contribute to excess energy intake. These need to be chosen carefully and eaten in moderation.</p> <p>Examples include:</p> <ul style="list-style-type: none"> » 99% fruit juice (<300mL) » Artificially flavoured drinks e.g diet drinks (600mL) » small fruit muffins(<60g) » Red meat with visible fat » Dairy free milks with no added calcium 	<p>These are energy dense and have little nutritional value. Most are high in saturated fat, added sugar and/or salt and can contribute to excess energy intake. These should only be eaten sometimes and in small amounts.</p> <p>Examples include:</p> <ul style="list-style-type: none"> » all deep fried food » soft / energy / sports drinks » chocolates and lollies » iced cakes » premium ice-creams (e.g. chocolate coated). » processed meats (e.g. lean ham & bacon) » sour cream
